OBJECTIVE

Results-driven Software Developer with experience in designing and optimizing scalable software solutions using Java and Python. Skilled in developing RESTful APIs, microservices, and integrating front-end components with ReactJS and Tailwind CSS. Proven ability to collaborate with cross-functional teams in an Agile environment, conduct in-depth code reviews, and deploy applications to cloud platforms like Microsoft Azure.

EDUCATION

Missouri University of Science and Technology

Aug 2022 - May 2024

Master of Science, Computer Science

- **Achievements:** Provost's Masters International Scholarship, CEC Deans Intl Masters Ac Scholarship

SKILLS

- **Programming languages (Backend):** C, C++, C#, Java, Python (Django), MATLAB, R
- **Web development languages (Frontend & Full Stack):** HTML, CSS, JavaScript, TypeScript, React.js, Next.js, Angular, Tailwind CSS, .NET Core
- **Data Visualization:** Matplotlib, ggplot2, Tidyverse
- **Database-related technologies:** SQL, MySQL, PostgreSQL, SQLite, NoSQL, MongoDB, Hadoop, HBase, Apache Hive, Pig, Apache Spark
- **Machine Learning:** Scikit-learn, TensorFlow, Keras, PyTorch
- **Cloud Technologies:** Azure, Cloud Storage, Cloud Services, Cloud Networking, Cloud Security, Virtualization
- **Operating systems:** Linux, Windows
- **Software known:** Tanner Spice, Proteus, NI Multisim, Arduino, Cameo, Excel, GitHub, XAMPP

PROFESSIONAL EXPERIENCE

Solutions UI/UX

Aug 2024 - Present

Junior Software Developer

Odessa, Florida

- Designed and optimized modular applications in Java and Python for diverse clients.
- Built front-end components (React, Angular) and REST APIs with Node.js and Express.
- Automated deployments on Azure with CI/CD pipelines, Git, and Docker.

Solutions UI/UX

Jun 2023 - May 2024

Software Developer Intern

Odessa, Florida

- Developed a mobile application prototype for client-facing interactions, utilizing Python Django for the backend and MongoDB for database management.
- Built interactive data visualization dashboards with Plotly and Flask, enabling insights into user behavior and system performance.

Missouri University of Science and Technology

Aug 2022 - May 2023

Graduate Teaching Assistant

Rolla, MO

- Taught Data Structures and AI courses to 100+ students, providing personalized tutoring that improved performance.
- Graded 50+ assignments weekly and offered constructive feedback, leading to improved student understanding and performance.
- Enhanced curriculum by creating course materials with faculty and incorporating inclusive teaching strategies.

Netsol Network Consultancy Pvt. Ltd. — Junior Software Developer

Jan 2021 – Mar 2022

- Developed backend services and RESTful APIs with Python, Java, and SQL.
- Integrated databases and supported cloud deployments in Agile teams. Ensured quality via code reviews, unit testing, and Git-based workflows.

Netsol Network Consultancy Pvt. Ltd. — Software Development Intern

May 2020 – Dec 2020

- Supported backend and web application development projects, quickly adapting to team practices and tools.
- Assisted in API integration, database queries, and debugging tasks.
- Gained practical exposure to Agile methodology and full-stack development workflows.

PROJECTS

MyLumps iOS and Android Apps

- Contributed to the development of a mobile healthcare application aimed at assisting women with breast cancer in self-tracking symptoms and health metrics.
- Collaborated with a cross-functional team including UX designers, architects, and QA engineers, following Agile methodologies to ensure timely delivery.
- The app was recognized with an Innovation Award at Orlando Synapse for its impactful approach to women's health support.

BrandLytics Web, iOS, and Android Apps

- Assisted in designing and developing a platform for brands and healthcare companies to analyze brand performance through interactive dashboards and analytics.
- Developed and integrated brand profiles and social profile tracking, enabling users to monitor brand presence and engagement effectively.
- Worked on cloud deployment strategies using Azure to ensure scalability and reliability for enterprise clients.

BrandRank iOS and Android Apps

- Developed a mobile application aimed at helping agents rank and select the best technological brands based on quality and service performance.
- Contributed to building intuitive user flows and an engaging UX design, enhancing the overall user experience for agents and clients.
- Collaborated with DevOps engineers to streamline deployment pipelines and improve app performance using Docker containers and Azure services.

Gendex: Gender Recognition using CNN

- Trained a CNN-based gender recognition model with a diverse dataset of over 10,000 images, achieving 95% accuracy.
- Conducted real-time testing of the model with a dataset of 500 faces, achieving an impressive 92% accuracy in accurately identifying gender.

EdgeScope: Real-Time Object Detection Using Different Edge Detection Technique

- Conducted in-depth research on 10 Edge Detection techniques, identifying the optimal method for Object Detection, and achieving a 15% accuracy improvement.
- Developed a MATLAB-based program with the chosen technique, demonstrating 20% faster processing on still and real-time images.
- Rigorously tested program, achieving 90% success rate in varied scenarios.
- Published research paper titled "[Real-Time Object Detection Using Different Edge Detection Techniques](#)", contributing insights to the field.

CERTIFICATIONS

- **Microsoft Certified: Azure Fundamentals:** Details available at: <https://www.credly.com/earner/earned/badge/d3c564dc-c03f-40da-9822-06bdc6a3425c>
